

John & Iris,

I am totally against this bill - one by one you elected or chosen legislators are stripping our freedoms away - it's bad enough that we can not purchase what we want in my (your?) RRSP's - which I will never make a contribution to again - like I said to the guy at TD Waterhouse - I suppose it's ok to buy Nortel and watch it go from \$120.00 to \$0.50 but I can't buy a penny stock because the money I have saved is dictated by some entity? Yea you can buy Nortel he told me, it's approved - what a bunch of bullshit, but I know the reason and that my RRSP can be taken away from me by the government at anytime, that's like getting a SIN Card and because of the promise by government of a pension I have to work into June for the government before I get to work for me - now you want to dictate to me what I can or can not spend my money on??? Who made you my Mommy & Daddy??? Get a life and grab a brain you both...

Kind regards,

Jason Martin
