

I am very concerned over the proposed recommendations made by the Canadian Security Administrators of requiring additional information that is required to already make investments.

I would strongly recommend that this proposal be terminated immediately as it has no benefit to anybody, already there is too much unnecessary information floating around that can get into the wrong hands and also could affect us for "the person selling the investment, deems it unsuitable for me to invest", what a nonsense that is.

Please act immediately on this.

Yours sincerely  
Paul Cornell
