

I am disturbed by what I hear about Proposal NI 31-103. Making the "Know Your Client" form a requirement is an invasion of my privacy. The information in these forms is extremely personal and sensitive in nature. We live in a world where this information will be misused. These are not governmental bodies that collect this documentation. They are for profits, and what kind of profit can be made by misdirecting this information?

I understand that people make bad investments, but it is not the governments business to prevent that. Is is also not the governments job to rescue those that do make bad investments. Personal freedom cuts both ways. We as a society want so much to insolate people from consequences. This is folly. Let me invest in what I want. Don't babysit me, and I will live with the consequences.

Thank you,
